

3-D HOLIDAY MUSKET

① **Cut** out 3-D Musket on the following sheet by carefully trimming along his edges. ② **Fold** along all dotted lines paying attention to whether they fold inward (valley fold) or outward (mountain fold). ③ **Tape/glue** tabs to their matching points. ④ **Look**. While keeping one eye closed, move around 3-D Musket and watch as it appears his head follows your movement. This illusion can also be achieved by looking at 3-D Musket through your cell phone camera.
